With your EndNote library open, select all of the references by highlighting a citation and clicking on Select All under the Edit menu, or pressing Ctrl-A.
After all the references are selected, choose **Copy Formatted** under the **Edit** menu, or right click and choose **Copy Formatted**.
Open your word processing program and Paste into a document. It will format the citations in the style you are using.

It is always best to proofread and edit the bibliography or works cited. Since references in your library could come from any number of resources, there could be formatting issues or errors.
